

1. Create a fresh repository by git only and upload file by using git only and do below functions on the same. And document each function with a screenshot.

Step 1: create a folder with the name "Test" and put some files on it.

Git command:

```
MINGW64:/c/Users/farhan/Desktop/Test
farhan@DESKTOP-TLPMK1E MINGW64 ~/Desktop (master)
$ git config --global user.name
mohd Farman

farhan@DESKTOP-TLPMK1E MINGW64 ~/Desktop (master)
$ git config --global user.email
mohd.farman1010@gmail.com

farhan@DESKTOP-TLPMK1E MINGW64 ~/Desktop (master)
$ mkdir Test

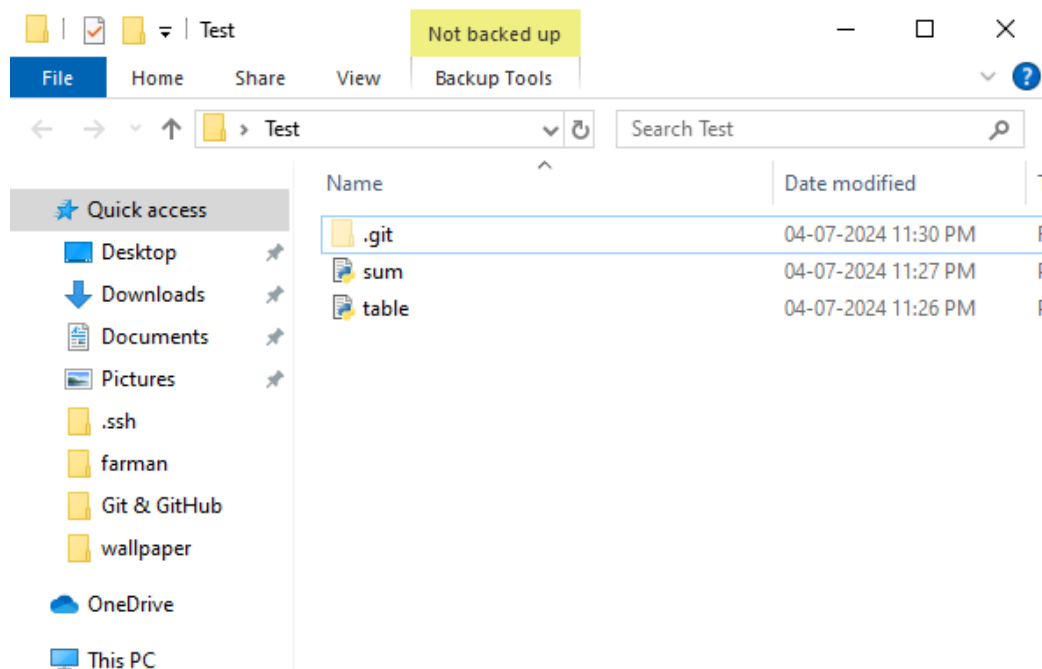

farhan@DESKTOP-TLPMK1E MINGW64 ~/Desktop (master)
$ cd Test

farhan@DESKTOP-TLPMK1E MINGW64 ~/Desktop/Test (master)
$ init
bash: init: command not found

farhan@DESKTOP-TLPMK1E MINGW64 ~/Desktop/Test (master)
$ git init
Initialized empty Git repository in C:/Users/farhan/Desktop/Test/.git/

farhan@DESKTOP-TLPMK1E MINGW64 ~/Desktop/Test (master)
$
```

Output:

Step 2: create a repository with your desired name(*math*) and copy its link.

e.g. [git@github.com:farman1998/math.git](https://github.com/farman1998/math.git)

1. In the upper-right corner of any page, select , then click New repository.
2. Type a short, memorable name for your repository. For example, "math".
3. Optionally, add a description of your repository. For example, "this repo is only for practicing git commands to upload files."
4. Choose a repository visibility. For more information, see "[About repositories](#)."
5. Select Initialize this repository with a README.
6. Click Create repository.

Congratulations! You've successfully created your first repository, and initialized it with a README file.

The screenshot shows the GitHub interface for a newly created repository named "maths". At the top, there are buttons for "Pin", "Unwatch" (with a count of 1), "Fork" (with a count of 0), and "Star" (with a count of 0). Below these are two main sections: "Set up GitHub Copilot" and "Add collaborators to this repository". The "Set up GitHub Copilot" section includes a button "Get started with GitHub Copilot". The "Add collaborators to this repository" section includes a button "Invite collaborators". Below these sections is a "Quick setup" section with a search bar containing "git@github.com:farman1998/math.git". Below the search bar is a link "Get started by creating a new file or uploading an existing file. We recommend every repository include a README, LICENSE, and .gitignore." Below the "Quick setup" section is a section titled "...or create a new repository on the command line" with a code block containing the following commands:

```
echo "# maths" >> README.md
git init
git add README.md
git commit -m "first commit"
git branch -M main
git remote add origin git@github.com:farman1998/math.git
git push -u origin main
```

 Below this section is another section titled "...or push an existing repository from the command line" with a code block containing the following commands:

```
git remote add origin git@github.com:farman1998/math.git
git branch -M main
git push -u origin main
```

Add a README

Functions:

A. Run the program and project by git only

Git command:

A screenshot of a Windows command prompt window titled "MINGW64:/c/Users/farhan/Desktop/Test". The window shows the following commands and output:

```
farhan@DESKTOP-TLPMK1E MINGW64 ~/Desktop/Test (master)
$ git ls-files
sum.py
table.py

farhan@DESKTOP-TLPMK1E MINGW64 ~/Desktop/Test (master)
$ python sum.py
9

farhan@DESKTOP-TLPMK1E MINGW64 ~/Desktop/Test (master)
$ python table.py
enter any number: 4
4 * 1 = 4
4 * 2 = 8
4 * 3 = 12
4 * 4 = 16
4 * 5 = 20
4 * 6 = 24
4 * 7 = 28
4 * 8 = 32
4 * 9 = 36
4 * 10 = 40

farhan@DESKTOP-TLPMK1E MINGW64 ~/Desktop/Test (master)
$ .....
```

B. Add any one pdf file from your local to GitHub by git

Git command:

```
MINGW64; c:/Users/farhan/Desktop/Test
$
Farhan@DESKTOP-TLPMK1E MINGW64 ~/Desktop/Test (master)
$ git status
On branch master
Untracked files:
  (use "git add <file>..." to include in what will be committed)
    farman.pdf

nothing added to commit but untracked files present (use "git add" to track)
Farhan@DESKTOP-TLPMK1E MINGW64 ~/Desktop/Test (master)
$ git add farman.pdf
Farhan@DESKTOP-TLPMK1E MINGW64 ~/Desktop/Test (master)
$ git commit -m "second commit"
[master c67e1ae] second commit
1 file changed, 0 insertions(+), 0 deletions(-)
create mode 100644 farman.pdf
Farhan@DESKTOP-TLPMK1E MINGW64 ~/Desktop/Test (master)
$ git push origin master

Add a README

C. Clone any github repository by git.

Git command:

```
MINGW64:/c/Users/farhan/Desktop/Test/math

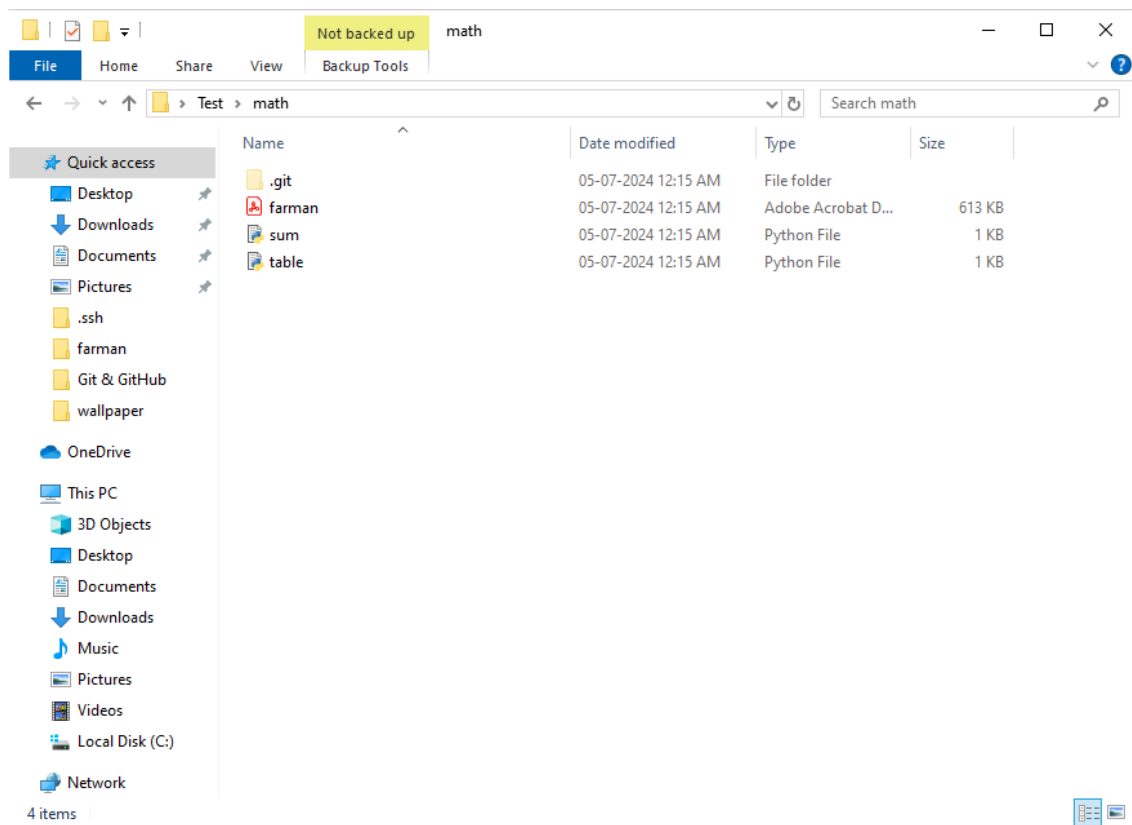

farhan@DESKTOP-TLPMK1E MINGW64 ~/Desktop/Test (master)
$ git clone https://github.com/farman1998/math.git
Cloning into 'math'...
remote: Enumerating objects: 7, done.
remote: Counting objects: 100% (7/7), done.
remote: Compressing objects: 100% (6/6), done.
remote: Total 7 (delta 0), reused 7 (delta 0), pack-reused 0
Receiving objects: 100% (7/7), 581.77 KiB | 1.88 MiB/s, done.

farhan@DESKTOP-TLPMK1E MINGW64 ~/Desktop/Test (master)
$ ls
farman.pdf  math/  sum.py  table.py

farhan@DESKTOP-TLPMK1E MINGW64 ~/Desktop/Test (master)
$ cd math

farhan@DESKTOP-TLPMK1E MINGW64 ~/Desktop/Test/math (master)
$ ls
farman.pdf  sum.py  table.py
```

Output:

2. Environment variables shouldn't get uploaded on GitHub so how will you delete the environment file while uploading codebase on GitHub?

Git command:

Step1. Remove .eve files from directory

```
MINGW64/c/Users/farhan/Desktop/test
Farhan@DESKTOP-TLPMK1E MINGW64 ~/Desktop/test (master)
$ ls -l
total 619
-rw-r--r-- 1 farhan 197121 49 Jul 5 00:55 ev.eve
-rw-r--r-- 1 farhan 197121 627164 Jul 4 11:09 farman.pdf
drwxr-xr-x 1 farhan 197121 0 Jul 5 00:15 math/
-rw-r--r-- 1 farhan 197121 29 Jul 4 23:27 sum.py
-rw-r--r-- 1 farhan 197121 102 Jul 4 23:26 table.py

Farhan@DESKTOP-TLPMK1E MINGW64 ~/Desktop/test (master)
$ git rm -r 'ev.eve'
rm 'ev.eve'

Farhan@DESKTOP-TLPMK1E MINGW64 ~/Desktop/test (master)
$ git commit -m "delete eve"
[master 18ffdc] delete eve
1 file changed, 3 deletions(-)
delete mode 100644 ev.eve

Farhan@DESKTOP-TLPMK1E MINGW64 ~/Desktop/test (master)
$ git status
On branch master
Your branch is ahead of 'origin/master' by 1 commit.
(use "git push" to publish your local commits)

README

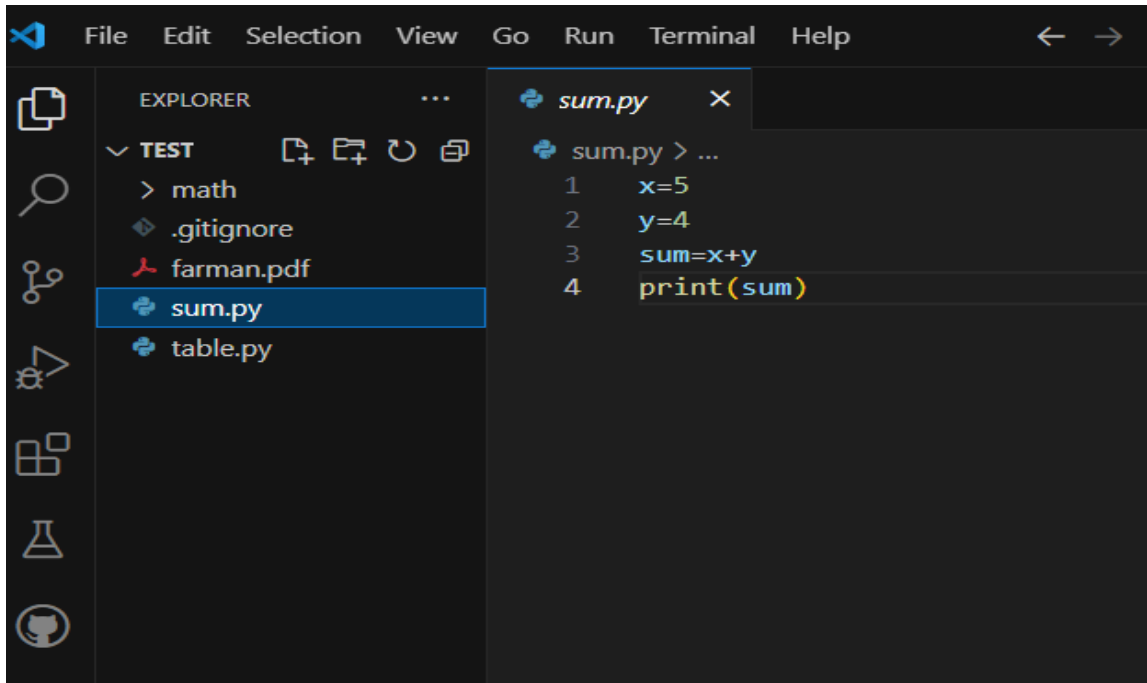

Add a README

Help people interested in this repository understand your project by adding a README.

Add a README

B. Change any line in code and do commit in any file of repository.

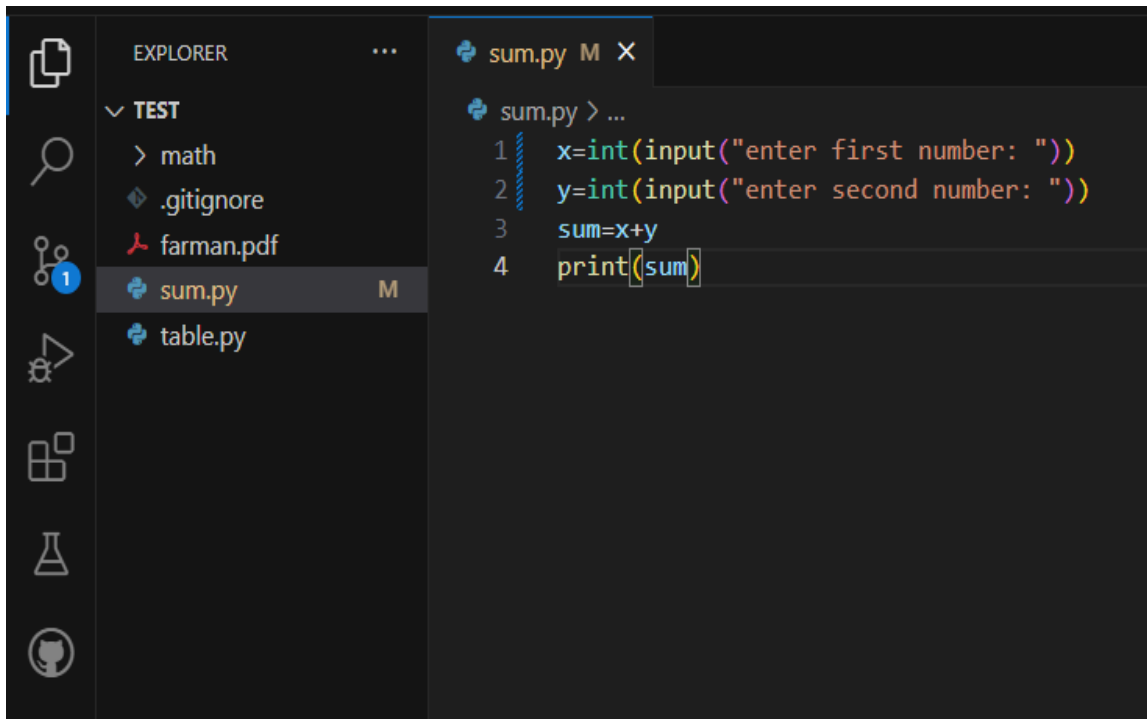

Before change

A screenshot of the Visual Studio Code editor interface. The Explorer sidebar on the left shows a project named 'TEST' with a subdirectory 'math' containing files '.gitignore', 'farman.pdf', 'sum.py', and 'table.py'. The 'sum.py' file is selected and highlighted. The main editor window displays the code for 'sum.py' with the following content:

```
sum.py > ...  
1 x=5  
2 y=4  
3 sum=x+y  
4 print(sum)
```

After change

A screenshot of the Visual Studio Code editor interface showing the same project as before, but with modifications. The Explorer sidebar shows 'sum.py' with a blue 'M' icon, indicating it has been modified. The main editor window displays the updated code for 'sum.py' with the following content:

```
sum.py M X  
sum.py > ...  
1 x=int(input("enter first number: "))  
2 y=int(input("enter second number: "))  
3 sum=x+y  
4 print(sum)
```

Git base code after change in code and commit

 MINGW64:/c/Users/farhan/Desktop/test

```
farhan@DESKTOP-TLPMK1E MINGW64 ~/Desktop
$ cd test

farhan@DESKTOP-TLPMK1E MINGW64 ~/Desktop/test (master)
$ status
